**ANUPAM PAINTS IS COMMITTED TO SUPPORTING TATA MOTORS & ITS
EXTENDED MANUFACTURING ECOSYSTEM WITH RELIABLE,
HIGH-PERFORMANCE, AND COST-EFFICIENT COATING SOLUTIONS
ENGINEERED FOR LONG-TERM SERVICE.**

PROTECTION • PREVENTION • DECORATION

*Paints For a
Lasting finish*

**High-Performance Coating Solutions for
Tata Motors & Its Manufacturing Ecosystem**

**Commercial Vehicles • Defence Vehicles
Trailers • Tipper • Fabricated Components**

WELCOME TO ANUPAM PAINTS

PURPOSE

This brochure presents Anupam Enterprises (Anupam Paints) as a technically competent, cost-competitive Indian coatings manufacturer capable of supplying approved-grade coating systems for use across Tata Motors production programs and its ancillary manufacturing ecosystem.

ABOUT US

Anupam Enterprises (Anupam Paints) is a 50+ year old Indian coatings manufacturer, supplying industrial, automotive, defence and heavy-engineering coatings across India.

We manufacture a comprehensive range of primers, topcoats, specialty coatings and auxiliaries, engineered for:

- Automotive fabrication units
- High-volume component manufacturers
- Defence & special-purpose vehicles
- Severe corrosion and outdoor service environments

All products are supported with **Technical Data Sheets (TDS), MSDS, batch traceability and consistent quality control.**

PERFORMANCE PHILOSOPHY

Our coating systems are designed with a **tiered performance approach**:

- **Minimum 500 hours Salt Spray Test (SST)** compliance for standard automotive & fabricated components
- Capability to engineer **1,000 to 3,000+ hours SST systems** for severe service environments
- High-performance systems designed to deliver **minimum 15 years service life** (application & exposure dependent)

WHY ANUPAM PAINTS FOR TATA MOTORS ECOSYSTEM

- 50+ years of industrial coatings expertise
- Strong experience in **automotive, defence & heavy-engineering sectors**
- Proven anti-corrosion and long-life coating systems
- Capability from **synthetic paints to advanced epoxy & PU systems**
- In-house formulation & performance customisation
- Reliable supply with batch-to-batch consistency
- **Clear cost advantage without compromise on performance**

PRICE ADVANTAGE

Anupam Paints offers a consistent 10–15% cost advantage compared to large national and multinational coating brands, while maintaining:

- Equivalent or superior technical performance
- Required corrosion resistance levels
- Full documentation and quality compliance

This enables significant cost optimisation across high-volume automotive and ancillary manufacturing.

CORE COATING SYSTEMS FOR TATA MOTORS APPLICATIONS

1. PRIMERS FOR FABRICATED & AUTOMOTIVE COMPONENTS

EPOXY ZINC PHOSPHATE PRIMER – GREY

Applications:

- Chassis components
- Structural members
- Fabricated automotive & defence parts

Key Properties:

- Excellent adhesion on MS & fabricated steel
- Active corrosion inhibition
- Compatible with synthetic, PU & epoxy topcoats
- ≥500 hours SST as standard
- Upgradeable to 1,000–3,000 hours SST systems

DTM (DIRECT-TO-METAL) PRIMERS

Applications:

- High-throughput automotive components
- Cost-sensitive fabricated parts

Advantages:

- Eliminates separate primer coat
- Faster production cycles
- Reduced overall coating cost
- Available in black & grey shades

2. TOPCOATS FOR COMMERCIAL & DEFENCE VEHICLES

1. SYNTHETIC CHASSIS BLACK PAINT

Applications:

- Commercial vehicle chassis
- Trailer & tipper frames
- Underbody & structural assemblies

Features:

- Proven mechanical durability
- Easy application & touch-up
- Cost-effective for large-volume usage
- Compatible over epoxy primers

2. SYNTHETIC 1K AUTOMOTIVE TOPCOATS

Applications:

- Automotive components
- Equipment housings
- Colour-coded fabricated parts

Benefits:

- Smooth, uniform finish
- Shade consistency across batches
- Suitable for mass-production environments

3. DTM BLACK – QUICK DRYING PAINT

Applications:

- Brackets, clamps, housings, assemblies

Key Advantages:

- Direct application on metal
- Fast surface dry & handling time
- Ideal for conveyerised & batch processes

4. PU (2K POLYURETHANE) PAINT SYSTEMS

Applications:

- Defence vehicle exteriors
- Outdoor-exposed automotive components
- High-visibility and premium parts

Performance:

- Superior UV resistance
- Excellent gloss & colour retention
- High chemical and weather resistance

3. ADVANCED & SPECIALTY COATINGS

1. HIGH-PERFORMANCE ANTI-CORROSIVE SYSTEMS

- Multi-layer epoxy + PU coating systems
- Designed for severe industrial, defence and outdoor exposure

Performance Capability:

- Up to 3,000+ hours SST
- Long-term corrosion protection (15+ years service life)

2. HEAT-RESISTANT PAINTS

Applications:

- Engine-adjacent components
- Exhaust-area and high-temperature parts

Features:

- Thermal stability at elevated temperatures
- Resistance to cracking, chalking & discolouration

3. HEAT REFLECTIVE & THERMAL BARRIER COATINGS

Applications:

- Vehicle bodies
- Defence cabins
- Special-purpose & operator cabins

Benefits:

- Reflects solar heat
- Reduces heat ingress
- Improves cabin comfort and thermal efficiency

4. ANTI-GRAFFITI COATINGS

Applications:

- Defence vehicles
- Public-facing vehicle surfaces
- Equipment enclosures

Features:

- Easy removal of paint & ink
- Protects underlying coating
- Available in clear and pigmented systems

4. THINNERS & AUXILIARIES

- Synthetic thinners
- Epoxy thinners
- PU thinners

Designed for:

- Consistent viscosity control
- Smooth application
- Reduced surface defects
- Automotive-grade primers & topcoats

- Defence camouflage-compatible coatings
- Abrasion-resistant systems
- Chemical-resistant coatings
- Custom shade & performance development
