

Anupam Paints

Colouring Success
Stories!

Chairman's Message:

MANMOHAN KEDIA

Chairman, *Anupam Paints*

Greetings,

As we flip through the pages of our past, we see more than just a company; we see a legacy. In 1972, my father sowed the seeds of Anupam Paints, a vision that has now flourished for five decades. And as I stand here today, reflecting on our journey, it fills me with immense pride and gratitude.

In our 50-year association with the paint industry, we have not merely manufactured paints; we have crafted stories. From Epoxy to Polyurethane, every product is a testament to our commitment to innovation, quality, and the art of transforming spaces. This dedication reflects in our long-standing partnerships with prestigious institutions like the Indian Navy and Indian Railways, which have placed their trust in us for over 35 years.

Anupam Paints is more than just a brand. It's a promise. A promise of colour, innovation, and excellence. We've not only painted walls but have brought them to life, turning mere buildings into vibrant masterpieces.

Yet, our real success is not measured in the number of walls we've painted, but in the trust we've built. We treasure the relationships we've fostered with our clients, many of whom have walked this journey alongside us for more than three decades. It speaks volumes about our vision for consistent quality, unparalleled customer satisfaction, and enduring commitment.

Beyond business, my heart has always been aligned with various prestigious associations – from the Indian Paint Association, Indian Small Scale Paint Association, FOSMI, CII, IPCA, IRMA to several charitable institutions – striving to make a difference in every sphere.

As we embark on the next chapter, our spirit remains unwavering. We renew our commitment to you – to excellence, to sustainability, and to painting a world filled with possibilities.

Thank you for 50 golden years of trust and camaraderie. Together, let's envision a future even brighter and more colourful than our illustrious past.

With gratitude,

Manmohan Kedia

(Chairman)

The Odyssey of Anupam Paints: Charting the Spectrum of Success

02 The Evolution

Diversifying into paints, coatings, and varnishes, Anupam Paints quickly gained a reputation for quality and reliability. Industry giants took notice, leading to increased orders for Protective Coatings. With our rapid growth, we relocated to a larger facility on Cossipore Road in Kolkata's industrial hub.

03 Prestigious Partnerships & Certifications

Two significant endorsements from the RDSO for Indian Railways and the Indian Navy solidified our reputation as a quality-driven company. This momentum resulted in numerous achievements, including ISO 9001 and ISO 14001 certifications, partnerships with Engineers India Ltd., and innovative tech-transfers with the DRDO, thereby setting new industry benchmarks.

07 A Legacy in Continuation

Today, Anupam Paints, located at the strategic base of Kolkata's Park Street, reflects five decades of unwavering commitment. Guided by Chairman Mr. Manmohan Kedia, the third generation of the Kedia family combines youthful dynamism with time-tested wisdom, shaping the company's future vision.

01 The Humble Beginning

In the transformative year of 1972, the visionary Late Shri Kashi Prasad Kedia began a remarkable journey that turned a modest family garage into today's Anupam Paints.

04 A Pioneering Approach to R&D

To stay ahead, we invested in our advanced Cossipore-based state-of-the-art laboratory. Equipped with premium imported testing instruments, it exemplified our unwavering commitment to unmatched quality, distinguishing us in Kolkata's paint industry.

06 Embracing Decorative Paints

In 2021, we ventured into the world of decorative paints, catering to both residential and commercial sectors. Committed to beauty, protection, longevity, and sustainability, our green paints with zero VOC resonated with the modern, environmentally-conscious consumer.

05 2020: A Milestone Year

In 2020, after almost five decades in the industry, we marked a transformative year. The opening of our state-of-the-art semi-automatic facility in Howrah's Foundry Park, boasting a monthly capacity of 1000KL, was a testament to our ambition. We also enhanced our competitive edge by bringing resin production in-house and expanded our advanced laboratory.

Mission & Vision:

M

Our Mission

With a legacy of expertise in industrial paints and a recent foray into decorative paints, our mission is to deliver innovative, sustainable, and high-quality products that empower our customers to create enduring and visually stunning spaces.

V

Our Vision

Our vision is to be a global leader in comprehensive paint solutions, seamlessly bridging the industrial and residential sectors by our proven industrial paint excellence with the world of decorative paints. We aim to set new industry standards for performance, sustainability, and aesthetics. Together, with our customers, we envision a world transformed by the power of paint.

Core Values of Anupam Paints

Innovation

Through collaboration within the organisation, we provide an environment that encourages and supports innovative thinking, entrepreneurial activity and embraces change.

Quality assurance

With a strong commitment to continuous improvement, we challenge ourselves to add value to everything we do. We provide a consistently high level of quality in our products and industry leading service to our customers.

Integrity

To develop a work environment where our employees are open-minded, voice opinions, respect diversity and take ownership of their work.

Social Responsibility

We provide a safe and healthy work environment for our employees and customers while continuing to minimise our impact on the environment.

Respect

We treat each other with dignity and respect, and support our employees to develop and grow professionally. We provide a positive and challenging work environment that encourages and recognises individual success and commitment.

Industrial:

Industrial coatings are primarily manufactured and used for their protective and functional properties. Our paints and coatings are known for their excellent adhesion, chemical resistant properties, long life, and ultimate productivity. Our work reflects our reliability, commitment to quality, and excellent performance in the Paint Industry.

Decorative:

Our range of decorative paints are meticulously crafted and widely utilised to enhance the aesthetic appeal of surfaces, both indoors and outdoors. Our range of paints is renowned for its vibrant colors, superior finish, and durability. We take pride in our commitment to creating paints that not only beautify but also protect surfaces, ensuring they remain fresh and vibrant for years to come.

Range of Decoratives:

AZURA ADVANCE EXTERIOR EMULSION

- 15 years Performance Warranty
- Anti-Carbonation
- Film elongation can reach up to 125%

Decorative Features:

Our range of decorative paints are meticulously crafted and widely utilised to enhance the aesthetic appeal of surfaces, both indoors and outdoors. Our range of paints is renowned for its vibrant colours, superior finish, and durability. We take pride in our commitment to creating paints that not only beautify but also protect surfaces, ensuring they remain fresh and vibrant for years to come.

What sets us apart from the rest:

- ◆ Tailor-made Products & Shades.
- ◆ Expert Consultation & Technical Support.
- ◆ Advance Technology Integration.
- ◆ Highly Skilled Application Support.
- ◆ Environmental Friendly Paint Options.
- ◆ In-house Research & Development.

Features

- 👉 Low VoC
- 👉 Conforms to green building specifications
- 👉 Ultra smooth finish & high sheen
- 👉 Superior coverage & opacity
- 👉 High durability & excellent colour retention
- 👉 Best in-class washability & scrub resistance
- 👉 Weather guard & long term protection
- 👉 Eco-friendly options

**Our paints are enhanced with Carbon Nano-Struct Technology
— For coatings that Outperform and Outlast**

A. Speciality Coatings:

- Heavy Duty Non-Skid Paint
- Duramac – Road Marking Paint
- Sound Insulating Coating
- Fireseal – Intumescent Fire Retardant Coating
- Anti Graffiti Coating
- Marine Coatings
- Super Build Glass Flake Coatings
- Heat Resistant Aluminum Coating
- Inorganic Zinc Silicate Coating
- Black Bituminous Coating
- Pipeline Coatings
- Rust Cleaners

B. Epoxy Coatings:

- Durapoxy – Range of Epoxies – Primers, Intermediates, Mastics, Linings and Finishes
- Duracoat – Hi-Build Epoxy Coatings
- Durapatch – Epoxy Floor Patching and Concrete Repair Compound
- Epoxy Food Grade Coating
- Solvent Free Epoxy Coating
- Coroguard – Coal Tar Epoxy Coatings
- Anticora MIO – Epoxy Micaceous Iron Oxide Coating

C. Wood Coatings:

- Qualac – Range of Wood Coatings

E. Chlorinated Rubber Coatings:

- Anuchlor – Range of Chlorinated Rubber Primers, MIO, Paints

G. Primers:

- Anticora – Range of Anti Corrosive Primers
- Anuzinc – Epoxy Zinc Rich Primer
- Blastprime EZP 200 – Epoxy Zinc Phosphate Blast Primer
- Anuprime – Etch Primer/Adhesion Promoting Primer
- PP & FRP Primers – Range of Primers for Plastic Surfaces
- Range of Synthetic Primers

I. Cathodic Electro-Deposition (CED) Coatings:

M. Others:

- Range of Industrial Use Putty
- All types of Thinners

D. Fluorescent Coatings:

- Anuglow: Range of Fluorescent Coatings

F. Silicone Coatings:

- Heatguard – High Heat Resistant Silicone Coating

H. Polyurethane Coatings:

- Anuthane – Range of Polyurethane Coatings
- Thermosetting Acrylic Enamel
- Monocoat – Aliphatic PU High Build Enamel
- Range of Alkyd Based Enamels

J. Polyaspartic Coatings:

K. Polysiloxane/Polysilazane based Coatings:

L. Fluoropolymer Coatings:

Industrial Features:

**Tailor made solutions
for client requirements**

**Pre-painting
site inspection**

**Technical & Product
guidance**

**Superior
protection**

What sets us apart:

-  A **50-year-old** paint manufacturing company **located in West Bengal**
-  We manufacture various high-performance paints and coatings for organisations such as the **Indian Navy, Indian Railways, GRSE Ltd, BHEL, TWL Shipbuilders, Wagon builders, Oil, Gas , Petrochemical & Refineries & many more esteemed PSUs**
-  We are an **MSME unit** with cutting-edge manufacturing and technical capabilities providing direct **employment to 150 individuals**, thus touching lives of over 500 people in the state!
-  Wide range of products available with **in-house R&D and testing**
-  **After sales service that ensures our paints bring smiles to our users**

Applications of Products:

09

**Locomotives,
Railway
Coaches &
Wagons**

**Oil, Gas,
Petrochemical
&
Refineries**

**Heavy Metal
Structures**

**Marine
Crafts**

**Freight

Tractors

Speciality Coatings:

HI-BUILD BITUMEN COATING:

WRAS Certified

Suitable for potable water contact (pipes, fittings, MS tubes, rods).

Waterproof & Leak Prevention

Highly effective on concrete/cement surfaces to prevent water loss.

Quick Drying Formula

Rapid drying ensures minimal downtime.

All-Weather Durability

Reliable protection across diverse weather conditions.

Safe & Non-Carcinogenic

Non-toxic formula with UV and water resistance.

SOLVENTLESS FOOD-GRADE EPOXY COATING:

It is an amine-cured, 100% solid, two-component high-build, heavy-duty epoxy protective coating designed to combat corrosion, erosion, abrasion, chemical attacks, temperature extremes and other destructive conditions.

- ◆ Eliminates solvent hazards and ventilation problems; hence, it is **fully compatible with food items**.
- ◆ Produces a thick non-porous and highly resistant film as compared to conventional solvent-borne coatings that produce thin films with inherent porosity.
- ◆ Ideal for heavy industrial, chemical, marine, splash and spillage, fresh water, seawater and chemical Immersion.

INTUMESCENT FIRE RETARDANT COATING:

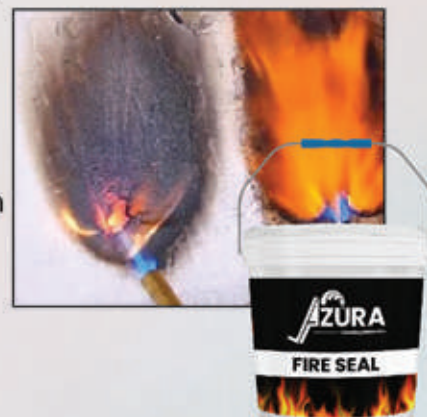

Fire Seal is a high-performance **intumescent fire-retardant coating** for interior and exterior applications, designed to protect any type of substrate and structure. On exposure to fire, it rapidly expands to form a protective char layer that slows heat transfer and fire spread.

120-MINUTE FIRE RESISTANCE

(2-hour rated protection)

- ◆ Expands up to **100× thickness** for superior thermal insulation
Reduces heat transfer and smoke formation
- ◆ Dual-layer system for metal structures
- ◆ Advanced carbon nano-structured technology for enhanced durability
- ◆ **Salt spray resistance ≥ 1000 hours**
- ◆ Excellent UV and weather resistance with lasting gloss and color retention

Fire Seal delivers **reliable fire protection, corrosion resistance, and long-term durability** in a single advanced coating solution.

This product conforms to the criteria specified in IS 17044-2018, ASTM E119, and UL 263.

QUICK DRYING PAINTS / 10 MINS DRYING:

We have developed high-performance Quick Drying Coatings tailored for the automotive industry, enabling faster production cycles without compromising on protection or finish.

Quick Drying Paints – Salient Features:

- ◆ **Fast touch drying within 10 minutes**
- ◆ Excellent adhesion to metal substrates
- ◆ High gloss and color retention
- ◆ Reduces curing energy consumption
- ◆ Ideal for OEM and after-market applications
- ◆ Provides superior corrosion and weather resistance
- ◆ Compatible with automated spray systems
- ◆ Available in custom shades and finishes
- ◆ Engineered to meet the demands of modern auto manufacturing, this coating improves productivity while ensuring long-term durability and aesthetics.

Speciality Coatings:

DURAFLO / FLOOR COATING:

Heavy-Duty Epoxy Floor Topping – Self-Priming, Seamless, and Maintenance-Free

DURAFLO is a solvent-free, high-strength epoxy floor topping that primes and finishes in one step. Designed for industrial, commercial, and high-traffic environments, it bonds to a wide range of substrates and delivers long-term, maintenance-free flooring.

Duraflo – Salient Features:

- ◆ **Self-Priming, Seamless Finish:** Single-step application ensures uniformity and ease of maintenance.
- ◆ **Multi-Surface Compatibility:** Adheres to concrete, metal, stone, wood, and asphalt.
- ◆ **Extreme Durability & Mechanical Strength:** Resistant to abrasion, impact, and heavy factory traffic.
- ◆ **Superior Chemical & Water Resistance:** Withstands acids, alkalis, oils, solvents, and detergents.
- ◆ **Fast Curing & Shrink-Free:** Quick setting with negligible shrinkage, even in humid or cold conditions.

HEATSHIELD / GLASS COATING:

Azura HeatShield is a Liquid Thermal Insulation Coating which is non-toxic & transparent, with high hardness, super thermal insulation, fast and easy application, with specially strong penetration and can be permanently attached to the glass surface. It is perfect for commercial/residential windows, hospital windows, school windows, glass manufacturing, skyscrapers, vessels, yacht, cruise ship and homes.

HEATSHIELD – Salient Features:

- ◆ **Blocks 99% UV & 95% IR Radiation:** Protects interiors while preserving visibility.
- ◆ **Reduces Room Temperature by up to 15°C:** Maintains indoor comfort and reduces energy load.
- ◆ **Cuts Energy Consumption by Over 30%:** Significant savings in heating and cooling costs.
- ◆ **Scratch, Water & Abrasion Resistant:** Highly durable—25,000 abrasion cycles tested.
- ◆ **Zero Off-Gassing & Eco-Friendly:** Safe, odorless application—fully cures in 7 days.

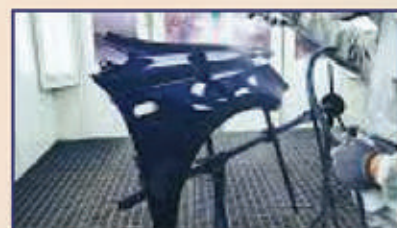

AUTOMOTIVE RANGE OF COATINGS:

Our Automotive Coatings are engineered to deliver **exceptional protection, superior aesthetics, and long-term durability** for vehicles and automotive components operating in demanding conditions. Designed for both OEM and refinishing applications, these coatings ensure **high gloss, excellent surface protection, and consistent performance** across all climates and road conditions.

Automotive Coatings – Salient Features:

- ◆ Excellent gloss, colour retention & UV resistance
- ◆ High resistance to scratches, stone-chips & abrasion
- ◆ Strong protection against fuels, oils, coolants & road salts
- ◆ Smooth, premium finish for superior visual appeal
- ◆ Fast-drying systems for reduced production & repair time
- ◆ Excellent adhesion on steel, aluminium, plastic & composites
- ◆ Suitable for OEM manufacturing, refinishing & commercial vehicles

ANUGLOW / GLOW IN THE DARK:

Anuglow: Glow in the Dark Paint is a photoluminescent coating designed to absorb light and emit a luminous glow in dark environments. This high-performance, self-illuminating paint is ideal for safety applications, decorative purposes, and special effects. It charges under natural or artificial light and glows in the dark for hours, offering visibility and aesthetic appeal.

Anuglow – Salient Features:

- ◆ **Glow Effect:** Provides long-lasting illumination in dark conditions after absorbing light.
- ◆ **Safety Applications:** Enhances visibility for emergency exits, pathways, and other critical areas.
- ◆ **Durable Finish:** Resistant to weathering, ensuring a long-lasting glow effect indoors or outdoors.
- ◆ **Rechargeable:** Continuously recharges under light exposure, making it a sustainable safety solution.
- ◆ **Low Maintenance:** Requires no electrical power, reducing operational costs.
- ◆ **Non-Toxic & Eco-Friendly:** Safe for use in public spaces, homes, and industrial settings.
- ◆ **Customizable Colors:** Available in multiple colors such as green, blue, yellow, and more.

Speciality Coatings:

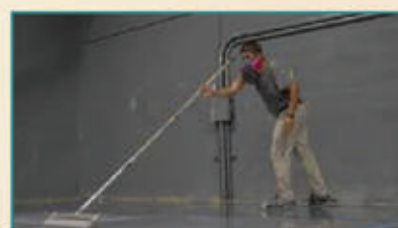

POLYASPARTIC COATINGS:

Polyaspartic is a next-generation, rapid-curing protective coating system engineered to **replace traditional multi-coat epoxy and polyurethane systems**. Designed for superior performance in harsh environments, it provides **exceptional UV stability, corrosion resistance, and long-term durability**—all achievable in **a single high-build coat**.

With its fast setting time and outstanding mechanical strength, Polyaspartic is ideal for applications where **speed, durability, and reduced downtime** are critical.

Polyaspartic – Salient Features:

- ◆ **Ultra-fast curing, high-build coating system** suitable for single-coat applications.
- ◆ **Outstanding UV and weather resistance** – maintains gloss and colour for years.
- ◆ **Exceptional corrosion protection** for steel, galvanized steel, aluminium & concrete.
- ◆ **Superior chemical and abrasion resistance** against oils, fuels, acids, alkalis & solvents.
- ◆ **High mechanical strength** with excellent impact and flexibility properties.
- ◆ **Reduced downtime** – faster return to service than epoxy or PU coatings.
- ◆ **Non-yellowing, smooth decorative finish** suitable for premium architectural and industrial use.
- ◆ **Ideal for railways, bridges, infrastructure, heavy machinery, and marine environments.**
- ◆ **High film build achieved in a single coat**, reducing manpower and application time by over 50%.
- ◆ **Consistent adhesion** on metal & concrete substrates; designed for long-term performance.

ANTI – GRAFFITI:

- ◆ **This coating prevents graffiti from bonding to the surface** and protects the wall from damage due to vandalism on account of graffiti, sticking bills, etc.
- ◆ The coating **forms a thin, invisible layer** between the wall and the graffiti, and cleaning with water will remove the graffiti completely.

DTM COATINGS (ALKYD | EPOXY | PU):

DTM (Direct-to-Metal) coatings are designed to **adhere directly to steel**, providing effective corrosion protection without the need for a separate primer. They reduce application time and cost while delivering dependable performance in industrial and exterior environments.

DTM Coatings – Salient Features:

- ◆ Direct application on metal without primer
- ◆ Strong adhesion and corrosion resistance
- ◆ Available in Alkyd, Epoxy, and PU systems
- ◆ Suitable for C2–C4 service environments
- ◆ Easy application and reduced coating cycles
- ◆ Ideal for structural steel, machinery, and exterior metal surfaces

FLUOROPOLYMER COATINGS:

Fluoropolymer coatings are high-performance protective systems engineered to provide **exceptional UV resistance, long-term corrosion protection, and superior colour and gloss retention**. Designed for harsh marine, industrial, and exterior environments, these coatings significantly outperform conventional epoxy and polyurethane systems in durability and service life.

Fluoropolymer Coatings – Salient Features:

- ◆ Exceptional **UV, weathering, and corrosion resistance**.
- ◆ **Gloss and colour retention up to 4× longer** than PU coatings.
- ◆ Highly resistant to **chemicals, salts, pollutants, oils, and fuels**.
- ◆ **Non-chalking, non-yellowing finish** for long-term aesthetics.
- ◆ Designed for **severe marine, coastal, and industrial environments**.
- ◆ Provides **extended service life (15–20 years)** with minimal maintenance.
- ◆ Ideal for **bridges, railways, infrastructure, architectural cladding, and exposed steel**.

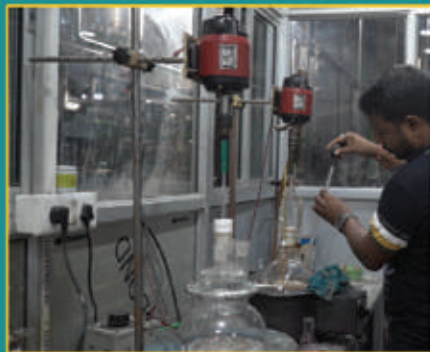

Manufacturing Equipment & Testing Facilities:

List of Equipments & Products:

(a)	Dispersion Equipment	Various types of dispersion equipments like i) Ball Mills, ii) Dyno Mills, Twin Shafts Disperser, High Speed Dispersers, Attritors etc.
(b)	Mixing Tanks	For balancing & laid down process of the dispersed paints mixing tanks with stirrers of different capacities are installed on the first floor for filling from ground floor.
(c)	Alkyd Plant	Resin plants with boilers for captive consumption of various types as per production needs.
(d)	Water Treatment Plant	Water treatment with UV treatment for consumption in water based paints.
(e)	Silent Generator	180 KVA generator is installed for emergency requirement.
(f)	Miscellaneous	All other necessary machines are there for respective functions.
(g)	Testing Equipments	All the necessary testing equipments like Wet Scrub Resistance, Spectrophotometer, QUV Accelerated Weathering Tester, Salt Spray Apparatus, GLC etc for R&D activities & regular batch testing/ in process materials testing are installed in-house.

Awards & Recognitions :

Award presented by the then Railways Minister Mr. Suresh Prabhu to Mr. Manmohan Kedia for excellent service to Indian Railways.

Mr. Manmohan Kedia being awarded at the Biennial Conference of The Indian Paint Association by Mr. Ashwin Dani, the founder of Asian Paints.

Awards & Recognitions :

Mr. Manmohan Kedia holds the position of Vice President & President-Elect for the Indian Paint Association.

Mr. Anupam Kedia was honoured as Convenor for the 32nd Indian Paint Conference hosted by the Indian Paint Association in Kolkata.

Our Aim as an MSME:

As an MSME, we are dedicated to empowering families across India, in alignment with the Government of India's vision of Make in India. We aim to make a difference and empower as many individuals as possible. Additionally, we are committed to expanding our outreach and collaborating for sustainable, long-term solutions.

Our goal is to achieve greater success together as a unified entity. With each opportunity, we will continue to extend our reach, touching and transforming more lives in our Make in India journey.

Highlights

Let us have a look at some of the most renowned paint companies of India along with their contact addresses:

Paint Company	Address (Head Office)	Contact Number

List of Indian Paint Manufactures

Selecting high quality manufacturer is important for painting of Pipes and Equipments. Here is a list of some of qualified paint manufacturers in India:

1. Asian Paints (I) Ltd., Mumbai
2. Berger Paint Ltd., Kolkata
3. Goodlass Nerolac Paints Ltd., Mumbai
4. Chemguard Coatings, Mumbai (For Ameron, USA Products only)
5. Chokugu Marine Paints Pte. Ltd., Mumbai/Singapore
6. Shalimar Paints Ltd., Kolkata
7. Sigma Coatings, Mumbai
8. CDC Carboline Ltd., Chennai
9. Premier Products Ltd., Mumbai
10. Coromandel Paints & Chemicals Ltd., Vishakhapatnam
11. Anupam Paints, Kolkata
